Ilya Mukhamedov
Full-stack Developer

+972-53-458-1722 | honeyflym@gmail.com | LinkedIn | GitHub | Website

I am a Software Developer with experience in creating full-stack web solutions. I am seeking opportunities to contribute and grow within a dynamic organization. My journey in development has been fulfilling, and I am passionate about applying my expertise to solve challenges and drive innovation.

Technical Skills

HTML5	JavaScript	Node.js	Vite	Redux	Express.js	Babel	Vercel	REST API
CSS3	React	Next.js	GCP	NPM	MongoDB	Postman	Figma	Webpack

Education

2023-2024: Full-Stack Development Program, TripleTen:
- A 12-month intensive online bootcamp designed to train talents to be successful Full Stack Developers in Israel. Coursework includes 6 real data-based projects.
- **Final Project** (Crypto Spotter):
  - Created a feature for users to track and analyze their favorite cryptocurrencies, helping them make better investment choices.
  - Used Chart.js to show historical price data for selected cryptocurrencies, giving users clear and useful information.
  - Made a custom pagination component to handle long lists of cryptocurrencies.
  - Set up Routes and Route components with React Router to make navigation smoother and more intuitive throughout the app.
- **WTWR** (What to Wear?):
  - Developed a feature that utilizes external weather data to provide personalized clothing suggestions based on users' local weather conditions.
  - Successfully built the application's frontend using React for a complex web application.
  - Integrated both frontend and backend components, deployed the project, and ensured seamless functionality through continuous development and maintenance.

2017-2022: B.A. in Management, University of International Economic Relations (Moscow, Russia):

Work Experience

2023-Present: Software Developer | Freelance:
- **Developed** two responsive and visually appealing landing pages for book sales using React, Vite, HTML5, CSS3, and JavaScript. Successfully launched the sales, incorporating a Telegram bot for seamless request handling.
- Gained experience working in a team, enhancing my skills in collaboration and version control with Git and GitHub.
- Improved problem-solving abilities by creating custom solutions tailored to client needs.
- Managed freelance projects from start to finish, demonstrating strong organizational and project management skills.

Additional Information

- **Languages:** English – B2, Russian - native.
- Currently working on improving my skills in Next.js.
